COMMISSION
DE COOPÉRATION
ENVIRONNEMENTALE

30 years of the CEC: 1994-2024

Mission

In the context of environmental, economic and social linkages between Canada, Mexico and the United States, the CEC facilitates effective cooperation and public participation to conserve, protect and enhance the North American environment in support of sustainable development for the benefit of present and future generations.

Funding

The CEC receives funding of the Government of Canada through **Environment and Climate Change Canada**, the Government of the United States of Mexico through the **Secretaría de Medio Ambiente y Recursos Naturales**, and the Government of the United States of America through the **Environmental Protection Agency**.

What's the big deal about food waste?

- Did you know that about one third of all food produced for people around the world goes to waste? **That's huge.**
- Food waste is what happens in our homes and in stores, restaurants, schools and communities when we throw out perfectly good food.
- There's nothing wrong with this food, but it's ending up in the landfill, instead of our stomachs, **because of decisions we make.**

Olympic Peninsula, USA

Montréal, Canada

Mérida, México
